

Supplier CSR policy

This Supplier CSR policy sets out Precomp's expectations of its suppliers. It applies to any third party that supplies products, materials, and services to Precomp. We expect suppliers to drive these expectations throughout their own supply chains. We strongly encourage suppliers to actively work with established sustainability goals in line with UN's 2030 Agenda for Sustainable Development.

Our expectations

Code of Conduct and business ethics

Precomp expects suppliers to understand and comply with Precomp's Code of Conduct and demonstrate the highest standard of integrity and ethical conduct in all business activities. Extortion, bribery, unfair competition and all other forms of corrupt activities are unacceptable.

Legal compliance

Precomp expects suppliers to comply with all applicable local laws, regulations and good industry practice.

Health and safety

Precomp expects suppliers to provide a safe and healthy workplace for their employees, and to have documented health and safety policies and procedures in place, together with appropriate safety equipment.

Human rights and labor rights

Precomp expects suppliers to commit to upholding human rights and labor rights in line with the Ten Principles of the UN Global Compact. This means that suppliers, among others, should make sure that they are not complicit in human rights abuses such as harassment and discrimination and that they respect the freedom of association. Suppliers must not engage in, or benefit from, the use of child labor and forced labor.

Environment

Precomp expects suppliers to act in an environmentally correct manner. Suppliers must be aware of the environmental impacts of their actions and proactively seek to reduce their emissions to the air and water and to make efficient use of their resources and to limit their use of chemicals. Suppliers are strongly encouraged to implement ISO 14001 environmental management system.
